

## Notice Of Main Monthly Meeting For February 2008

The last time we looked at digital imaging was in June 2005. In the world of computing technology 2 ½ years is a very long time and since then there have been many changes. **“Advanced Digital Imaging”** is the topic for our first Main Monthly Meeting this year. It will be held on **Wednesday 6 February 2008 from 7:00pm for a 7:30pm** start at the **Rheinberger Centre** conference room. **Jeff Colwell** will be our presenter. Jeff runs the digital imaging Special Interest Group and takes care of the dedicated imaging equipment installed at our Holder office for use by members. He is Vice-President on the PCUG Committee and is an active, all-round member. You are sure to be informed and entertained this evening.

Jeff will introduce and lead a discussion on a selection of “advanced” procedures for enhancing the quality of digital images obtained by camera or scanner for display on screen or print, using tools provided in Corel Paint Shop Pro XI. Corresponding tools are provided in the Adobe range of Photoshop and many also in programs provided free with cameras, printers and scanners and new Microsoft services included in Windows Vista. Examples will be based on the experiences of our Digital Imaging Special Interest Group and from recent tutorials on the regeneration of images from damaged and faded photographs. Jeff will also touch on some of the mindsets that produce misunderstandings about digital imaging as a consequence of years of conditioning with film cameras and darkroom procedures.

There is always time for your questions during the presentation. After the meeting you are welcome to discuss your ‘in-depth’ questions on the topic with the presenter over a cuppa and biscuit or to meet any of the Committee. The meeting is free and open to the public with plenty of seating so feel free to invite a friend or colleague. Entry to the Rheinberger Centre is via Loch Street on the corner of Weston Street Yarralumla. The centre has well lit grounds, easy access to the conference room with off street parking.
